Key factors of ACO success in this project

Unilever was remodeling in one of its soap manufacturing lines at Unilever Cali. ACO designed and manufactured a drainage system that was not only highly efficient but also delivered in within the very short lead time specified for the project.

Testimonial

VERONICA RIERA, Project Coordinator:
“The ACO system is of extremely high quality and every aspect of it is well designed from the choice of material to its ability to be tailored to suit individual applications. This enables the end user is specify a high performance drainage system for use in their manufacturing plants.”
