

International Project Reference

Alif The Mobility Pavilion - Dubai Expo, UAE

Breaking down the divide between physical and digital worlds. The Mobility Pavilion, designed by the award-winning Foster + Partners, features the world's largest passenger lift, which will transport 160+ people at a time. The pavilion also stars a partly underground, partly open-air 330-metre track for you to see cutting-edge mobility devices in action.

Project name	Alif The Mobility Pavilion - Dubai Expo
Brand	ACO Building Drainage
Investor	Dubai Expo 2020
City of installation	Dubai
Commissioning date (month, year)	Q1 2021
Country of installation	UAE
Country of ACO sales organisation	ACO Dubai
Brand description	ACO Radius Slot Channel

Project information

Project description	“The core concept was to create an internal vessel for Expo’s three sub-themes of mobility, this provided the trefoil plan, each theme having its own ,hall’,“ said Gerard Evened, senior executive partner at Foster + Partners.
Key factors of ACO success in this project	A strong working relationship with the Landscape Architect in the UK & excellent communication with the Design Engineers at ACO Dubai ensured an accurate design & manufacturing process. We were faced with constantly changing ground levels due to the scale of the surrounding developments, this lead to numerous re-designs to accommodate a continually changing landscape.
